EQUIPCO FOODAD-100 V2 DATASHEET

Product Overview

Our most popular demonstration doodad, the Foodad 100 V2 is capable of measuring and logging up to 16 combobulates. Every Foodad rental includes an Allspark, making it suitable for energy generation projects and intergalactic warfare involving sentient autonomous robots. Incredibly versatile, the Foodad series is available in multiple configurations with all standard ports, infinite power generation, and built-in entertainment.

EQUIPCO FOODAD-100 V2 DATASHEET

Technical Specifications

- Includes one Allspark for infinite power generation
- SCSI port for legacy system integration
- 320x320 pixel backlit LCD display
- Rubber-reinforced housing for extreme environments
- 5-state multicolor status LED
- Bundled with Sony PlayStation 2 for idle-time productivity
- Self-contained power source with indefinite runtime

Technical Specifications

- Measurement Range: Up to 16 combobulates
- Power Source: Allspark Core (infinite runtime)
- Display: 320x320 pixel color LCD
- Connectivity: SCSI, RS-232, Quantum-Linked USB
- Weight: 12.4 lbs (with Allspark)
- Operating Temp: -40°C to +120°C
- Environmental Rating: IP69K / Space Vacuum Certified
- Data Logging: HyperDrive Memory Buffer (1.21 Zettabytes)

Applications

- Energy harvesting in off-world colonies
- Emergency dimensional power restoration
- Scientific field testing (quantum or mundane)
- Sentient robotic negotiations
- Time-travel stabilizer calibration
